

Profile 360 Reader

SIT URL

<https://apbsit110-234.airtelbank.com:443/profile360>

Headers

id :

encrypted using  new RSA encryption

channel :

IOS / ANDROID / WEB / RAPP

clientId :

unique identifier for use case, raise request using this [SOP](#) for your use case onboarding

contentId :

alphanumeric unique string for each request

Authorization :

basic auth username and password, will be shared during use case onboarding

searchBy :

accepts these values : (defaults to **MOBILE** if not passed)

AADHAAR , **ACCOUNT** , **CUST_ID** , **DEVICE_ID** , **MOBILE** , **REFERENCE** ,
UNIQUE_ID

Parameters

For every client, during client onboarding some fields will be configured in API backend (depending on client's requirement for fields). By default these configured fields will be present in the response body for that client, if further refinement / enrichment is required **exclusive**, **includes** parameters can be used

✓ strings that can be passed as parameter

natlId, gender, sex, maritalStatus, educationLevel,
motherName, motherMaidenName, fatherName,
fatherOrHusbandName, countryOfResidence, nationality,
homeBranch, homeBranchCode, icType, lang, language, circle,
category, categoryCode, custType, customerType,
subAccountType, fciAmount, customFciAmount,
amountFirstCashIn, cKycId, msme, dob,
dateOfBirthOrRegistration, creationDate,
customerCreationDate, modificationDate, activationDate,
activationDateTime, emailDetails, emailAddressMap, primary,
status, addresses, addressMap, localAddress,
permanentAddress, line1, line2, line3, line4, city, pincode,
zip, district, state, country,
corrAddressSameAsPermAddress, mobileNumberDetails,
mobileNumberMap, primary, secondary, name, prefix, first,
mid, last, full, shortName, firstName, midName, lastName,

exclusive

Comma , separated strings in **exclusive** parameter, this overrides the default fields set for client and returns only the fields specified in exclusive parameter

Comma , separated strings in **includes** parameter, these fields will be added in response (in addition to default / exclusive fields)

there are some fields which support additional customisation

field	values
products	active , inactive , product name such as DIGI_GOLD , FD , REWARDS etc.
mab	0 , 1 , 2 , 3
